Abstract (en)
An insert (4) for hydraulic nozzles (100), in particular for hydraulic nozzles (100) adapted to form a substantially conical spray or jet of a fluid, said insert (4) comprising a rigid body which extends in a longitudinal extension direction (0-0) between a first outer end surface (4M) and a second outer end surface (4V) opposite to said first outer end surface (4M), said first (4M) and second (4V) outer end surfaces being joined by a radial outer surface (4R), said insert (4) comprising at least one channel (3) for the passage of a fluid which extends between said first (4M) and second (4V) outer end surfaces.
