Abstract (en)  
A method of forming a bottom-gusseted package comprising a package body (112), a bottom gusset (120) and a top sleeve portion (124') positioned transversely of a longitudinal axis of the package body. Formation of the bottom-gusseted package is effected by positioning individual sleeves transversely of the longitudinal axis of a flexible web which forms the package body. During package formation, the flexible web is cut to form individual packages, with each individual sleeve positioned to form said bottom gusset in a respective package and cut of sleeve material positioned to form a top sleeve portion in a respective adjacent package.
