Abstract (en)  
[origin: WO2019122623A1] The invention relates to a system (1) for interconnecting electronic boards which is intended to be incorporated into a computer processing cabinet, and to a computer processing cabinet comprising such a system with application to the interconnecting of electronic boards in processing cabinets notably housed in data centres or processor rooms. The system (1) comprises a front wall (3) and a rear wall (7) each having an external face (3a, 7a) and an internal face (3b, 7b), the external face of the front wall comprising at least one front connection means (4) intended to allow the connection of an electronic board, the front connection means being connected to one or more front connection cables (18) on the side of the internal face of the front wall, the front and rear walls being able to be joined together temporarily by their respective internal faces using fixing means, so as to form a housing (1) inside which the connecting cables are located.
