Abstract (en)  
[origin: WO2018037056A1] The invention relates to a protective helmet and in particular to a protective motorcycle helmet, comprising an outer shell (1) for distributing impact forces and a socket (2), which is fixedly connected to the outer shell (1), for receiving an electrical additional device (3), wherein the socket (2) is arranged on an edge (6) of the outer shell (1) and the socket (2) is designed, when receiving the additional device (3), to guide the additional device substantially along an inner face (7) of the outer shell (1) in such a way that the received additional device (3) extends substantially along the inner face (7) of the outer shell (1).
