Abstract (en)  
[origin: WO2018037170A1] The case (10) for a stick of pasty substance (16) comprises a base (12) and a cap (14). The base (12) and the cap (14) each comprise an internal body (22, 34) of longitudinal axis (X) and an external body (24, 36). The base (12) and the cap (14) each bear at least two permanent-magnetisation members (44) positioned between the internal body (22, 34) and the external body (24, 36), each permanent-magnetisation member (44) being held axially between axial stop means (28, 38) borne by the internal body (22, 34) and a cylindrical ring (32, 42) of longitudinal axis (X) which comprises a diamagnetic or ferromagnetic material and which is arranged between the external body (24, 36) and the internal body (22, 34).
