Abstract (en)

[origin: WO2018035590A1] The present invention relates to a profile (10, 20) for article of furniture structurally configured to establish a first association position (30) and a second association position (31) in relation to the article of furniture, thus enabling flexibility in producing and assembling the profile and its corresponding system, and providing the user with an array of easy-to-apply finish options.
