Abstract (en)  
[origin: WO2018036648A1] The invention relates to a pack for cigarettes or rod-form articles, having a box part (11), which is delimited at least by a front wall (15), a rear wall (12), side walls (16, 17) and a base wall (14), wherein the box part (11) serves for accommodating at least one preferably cuboidal cigarette group (29), or group of rod-form articles, wrapped in an inner blank (30), and wherein the pack (10) has predetermined dimensions relating to the width, the depth and the height, and at least one dimension of the at least one cigarette group (29), or of the group of rod-form articles, is smaller than a corresponding dimension of the interior of the box part (11), and therefore the at least one cigarette group (29), or the group of rod-form articles, does not fill the interior of the box part (11) as far as the at least one dimension is concerned, and wherein the box part (11) contains a collar (26), at least comprising a collar front wall (27), which butts against the front wall (15) of the box part (11), and collar side walls (28), which are adjacent to side walls (16, 17) of the box part (11). The invention is characterized in that at least one base flap (32, 62) is arranged in extension of the collar front wall (27) and, forming an underside support for the at least one cigarette group (29), or group of rod-form articles, is directed transversely to the collar front wall (27), and therefore the collar (26) serves to compensate for at least one different dimension of the cigarette group (29), or group of rod-like articles.
