Abstract (en)  
[origin: WO2018037376A1] The present invention relates to a flexible or semi-flexible foam, or to a composition making it possible to obtain a flexible or semi-flexible foam, comprising a polyester polyol or a polymer comprising a polyester polyol. Said polyester polyol is obtained by a first polycondensation (a) of an alcohol sugar Z in C3 to C8 and of two identical or different diacids Y and Y' in C4 to C36 and a second polycondensation (b) of the product obtained in (a) with two identical or different diols X and X' in C2 to C12.
