Abstract (en)
[origin: KR20180057484A] The present invention provides a washing machine. A washing machine comprises: a cabinet; a tub arranged in the inside of the cabinet; at least one suspension device configured to reduce vibrations of the tub, and to connect the tub to the cabinet so that the tub is supported on the cabinet; and a position guide device having one end connected to the at least one suspension device and the other end connected to the tub, and configured to limit a movement range in the horizontal direction of the tub.
