Abstract (en)
[origin: US2018055095A1] A female undergarment including a first fabric layer having an abdominal region and a crotch region and a second fabric layer secured to the first fabric layer at the crotch region and at the abdominal region. The crotch region is defined by first and second leg openings. The second fabric layer, secured to the first fabric layer at the crotch region and at the abdominal region, defines a first opening between the first fabric layer and the second fabric layer proximate the first leg opening and a second opening between the first fabric layer and the second fabric layer proximate the second leg opening. Manufacturing the undergarment includes forming a first fabric layer having an abdominal region and a crotch region, and securing a second fabric layer to the first fabric layer at the crotch region and at the abdominal region, thereby defining the first opening and the second opening.
