Abstract (en)  
[origin: WO2018106136A2] The invention relates to an attachable spectacle case for spectacles or sun glasses capable of protecting the glasses and their lenses against pressure and abrasion. The spectacle case is made of a body (1) from a material which may be a flexible or rigid material and having a rectangular front side (a) and a rectangular rear side (b) separated by means of a central rectangular surface (c) and having folding lines (d) and (e) and the front side (a) is provided with a trapezoidal prism (2) symmetrically disposed at the bottom which is intended to secure the nasal saddle of the glasses, the spectacle case having the components of the closing device arranged on the trapezoidal prism (2) and on the rear side (b) of the spectacle case, and the glasses' temples are folded outwards of the spectacle case.
