Abstract (en)

[origin: WO2018042101A1] The invention concerns a hairstyling apparatus (1) for curling hair comprising a mandrel (3), a tank (10) of liquid, a wick (13) communicating with the tank so as to be imbibed with liquid, a heating element (21) incorporated into the mandrel and means for guiding the wick (13) configured to allow it to move from a passive position to an active position in which said wick is in contact with the heating element (21) in order to create steam. The apparatus (1) comprises a unit for counting time, a detection system (33, 38) for detecting the active position of the wick (13) configured to trigger the counting unit when it passes into the active position, and a signalling system configured to emit a signal to a user when the counting unit reaches a set time.
