Abstract (en)

[origin: CA3033965A1] This package (8) comprises compressible insulating products (1), each insulating product (1) having a longitudinal axis (X1), a peripheral surface and first and second ends. The package (8) comprises a stack (6) of at least two modules (5), where each module (5) comprises one row of insulating products (1) arranged side by side in a first direction (D1). The modules (5) of the stack (6) are superimposed in a second direction (D2) perpendicular to the longitudinal axes (X1) of the insulating products (1) and to the first direction (D1). The package (8) also comprises a cover (7) which encloses the stack (6) by covering five faces (62, 63, 64, 66, 68) of the stack, including the two end faces (62, 64) of the stack, formed by the ends of the insulating products (1) and at least the periphery of the sixth face (61) of the stack.
