Abstract (en)
[origin: WO2018041929A1] The invention relates to an escalator step (4), which contains a one-piece stepping body (21), two side ends (22, 23), and at least one supporting profiled element (24), which are designed as plug-in parts (21, 22, 23, 24) and have plug-in connections (37/53, 38/52, 39/54, 40/55, 41/68, 45/64, 66/67). Because of this division into plug-in parts (21, 22, 23, 24), the escalator steps (4) can be better transported in the disassembled state and assembled at the installation site with minimal effort.
