Abstract (en)

[origin: WO2018041738A1] The invention relates to a liquid treatment apparatus, in particular a mobile liquid treatment apparatus according to claim (1), to a use of a liquid treatment apparatus according to claim (10), and to a method according to claim (11) for treating, in particular sterilizing, a liquid, in particular water. At least one electrode pair is provided to produce at least one electric field, by which the liquid is penetrated in a treatment section and is treated, in particular sterilized, by means of irreversible electroporation.
