Abstract (en)

[origin: WO2018041446A1] The invention relates to a motor-vehicle door handle assembly, comprising a handle (80), wherein one or more sensors and/or electronic assemblies are arranged in the handle (80) and the handle (80) has at least one plug (30) for establishing electrical contacts for one or more sensors and/or electronic assemblies and at least one trough (70) for accommodating one or more sensors and/or electronic assemblies, wherein the plug (30) and the trough (70) are interlockingly and/or force-lockingly and/or frictionally and/or integrally connected to each other.
