Abstract (en)

[origin: EP3508276A1] The present invention relates to a spray nozzle for coating the vehicle flange, especially for PVC coating, characterized in that, the spray nozzle comprises: two spray bodies (100), which are provided with a spray opening respectively; a connection bridge (200), which on both ends are each connected with a respective spray body; and a connection bar (300), which on one end is provided with a joint (310) and on the other end is connected with the connection bridge (200), wherein, the two spray bodies (100), the connection bridge (200) and the connection bar (300) are connected with each other in the way of fluid-guiding, and wherein the connection bridge (200) has an opening, which can receive the vehicle flange to be coated, and when the opening receives the vehicle flange to be coated, the spray openings of the two spray bodies (100) can be oriented towards to the vehicle flange from the two opposite sides of the vehicle flange to be coated, respectively. The present invention also relates to a method for coating glue on a vehicle in the coating process.
