Abstract (en)

[origin: CN110131669A] The invention relates to a lighting and/or signalling device for a motor vehicle, said device (1) comprising a housing defining a mounting cavity; a structural skeleton (30) mounted in said cavity of said housing; at least one lighting and / or light-signaling module (40) comprising at least one light source, the device (1) further comprising at least one mask (60) adapted to at least partially cover the structural skeleton (30), and a transparent wall mounted on the housing and passing through the cavity. The structural skeleton (30) comprises at least two mounting interfaces, each of said module (40) and said mask (60) being mounted on said structural skeleton (30) via, respectively, one of said mounting interfaces.
