Abstract (en)
[origin: EP3508791A1] A household appliance with a wall element (10) having an aperture (20) formed therein, and an electric component (30) mounted in the aperture (20) is provided, wherein the electric component (30) comprises an abutment (36) which rests against a rim of the aperture (20) at a first side of the wall element (10), and at least one clamp (38) element which projects laterally from the electric component (30) and which rests against a second side of the wall element (10) opposite the first side. The rim of the aperture (20), at least in the region where the clamp element (38) rests against the wall element (10), comprises a bulge (22).
