Abstract (en)
[origin: WO2018047103A1] There is described a machining apparatus (1, 100, 200), associable with a machine tool, to perform a surface finishing operation on a workpiece to be machined that comprises an abrasive belt (2) in contact with the workpiece to be machined so as to be driven in movement by the workpiece, and loop closed on a plurality of rollers (3, 4, 5), and a braking device (10) comprising a braking element (11, 111, 211) adapted to brake the roller (3) so as to generate a relative motion between the abrasive belt (2) and the workpiece to be machined.
