Abstract (en)
[origin: WO2018046357A1] The invention relates to a composite work piece having at least one metallic cover layer and a non-metallic core layer, wherein the metallic cover layer and the non-metallic core layer are connected to each other, one atop the other, wherein the metallic core layer has, in a marking region on the side thereof facing the non-metallic core layer, a profile, in particular a surface profile, for marking the composite workpiece.
