Abstract (en)

[origin: WO2018046630A1] The invention relates to a system (200, 300) for producing an individual identification document, value document, or security document of a document type selected from a plurality of different document types, wherein the document has a personalized composite body, which comprises a document-type-specific selection of material sheets (512) in a document-type-specific sequence, wherein the system (200, 300) comprises a control device (218, 1044), which is configured to receive a data set for the document to be produced, wherein the data set comprises document-specific information and an identifier of the selected document type, wherein the control device is also configured to create a document-specific control scheme for the system (200, 300) on the basis of the data set, wherein the control scheme defines an individual document-type-specific selection and sequence of work steps to be performed for the document to be produced, and to control the system (200, 300) by means of the document-specific control scheme, a collating device (200, 302, 500, 500'), a laminating device (206, 340, 1000), a cutting device (206, 212, 350, 390), and a personalizing device (210, 370).
