Abstract (en)  
[origin: WO2018047041A1] The invention relates to a method for the elevation of a wooden element, comprising the steps of: cutting to form at least one incision (2) in a surface of the wooden element (1); inserting an expansive material into the at least one incision (2) of the wooden element (1); letting the expansive material expand in the at least one incision (2) so that an elevation of the wooden element (1) is achieved.
