Abstract (en)
[origin: WO2018046140A1] The invention relates to a system (100) having a fitting part (1) and having a profiled section (2), which has a longitudinal direction (L) and comprises a longitudinal groove (3) having a groove opening (4) which defines a plane (E) and also having two opposing undercuts (5, 5'), wherein, for fastening the fitting part (1) to the profiled section (2), the system (100) has at least two clamping elements (8), which can be turned between an assembly position (M) and a fastening position (H), wherein, in the fastening position (H), the clamping elements (8) each co-operate with precisely one undercut (5, 5').
