Abstract (en)  
[origin: WO2018046186A1] The invention relates to a device for detecting the surroundings of a motor vehicle. The device comprises a parking control device, a first data processing device and one or a plurality of sensor units which each have one or a plurality of environment sensors for detecting the surroundings of a motor vehicle. The parking control device is connected between the sensor unit(s) and the first data processing device. The invention further relates to a motor vehicle, a method for detecting the surroundings of a motor vehicle, a method for processing a motor vehicle, a system for detecting the surroundings of a motor vehicle and a computer program.
