Abstract (en)

[origin: EP3510879A1] An electronic cigarette, comprising a cartridge (20) and an atomizing assembly (30). The cartridge (20) comprises a top wall (21) and a side wall (22). The top wall (21) and the side wall (22) enclose to form an e-liquid storage cavity (23), the bottom of the e-liquid storage cavity (23) being open. The atomizing assembly (30) comprises an atomizing head (31); an air inlet channel (221) is provided on the side wall (22) on one side of the cartridge (20), and a smoke outlet channel (222) is provided on the side wall (22) on the other side of the cartridge (20). The atomizing head (31) is provided on the bottom side of the cartridge (20); the atomizing head (31) has an atomizing and heating channel (315), one end of the atomizing and heating channel (315) being in communication with the air inlet channel (221), the other end thereof being in communication with the smoke outlet channel (222). An e-liquid inlet hole (3111) is formed on the side wall of the atomizing head (31), and the e-liquid inlet hole (3111) is in communication with the e-liquid storage cavity (23). For the electronic cigarette, the integral design of the e-liquid storage cavity (23), the air inlet channel (221), and the smoke outlet channel (222) saves space and reduces the difficulty of assembling.
