Abstract (en)
A filter cleaning device (20) cleans off dust (D) adhering to a filter (21). The filter cleaning device (20) includes a front surface brush (23) (dust removal member) that removes dirt and dust from a surface of the filter (21), a filter drive gear (24) (filter drive section) that moves the filter (21) along the front surface brush (23), and a rear surface roller (41) (rotating member) disposed opposite the front surface brush (23) with the filter (21) in between, and that rotates with the movement of the filter (21).
