Abstract (en)
[origin: WO2018052151A1] The present invention is related to a container assembly (10, 20, 30) for a cosmetic formula (F). The container assembly includes a main body (100, 200, 300) for accommodating the cosmetic formula (F), the main body (100, 200, 300) having an opening (101, 201, 301) at a top end thereof; and a cage (110, 210, 310) which is accommodated within the main body (100, 200, 300) through the opening (101, 201, 301) so as to extend within the main body (100, 200, 300), wherein a natural material (M) is accommodated within the cage (110, 210, 310). The cage (110, 210, 310) is configured to allow the cosmetic formula (F) to flow into and flow out of a space within the cage (110, 210, 310) so that the cosmetic formula (F) can contact the natural material (M). Further, the cage (110, 210, 310) is configured so as to prevent the natural material (M) accommodated there within from exiting to the outside of the cage (110, 210, 310). The present invention is also related to a kit for forming the container assembly (10, 20, 30) for the cosmetic formula (F).
