Abstract (en)
[origin: CN107811576A] A device for cleaning a rotary brush of a robotic floor vacuum cleaner, comprising a movable body (10) arranged to come into contact with at least one outer surface of the rotary brush in order to remove waste entangled with the rotary brush, characterized in that the movable body (10) comprises at least one cutting edge, arranged at the periphery of the movable body (10), and in that the movablebody (10) is movable in rotation about an axis, such that said at least one cutting edge runs over said at least one outer surface of the rotary brush when the latter is in contact with the movable body (10) and rotating in order to be cleaned.
