Abstract (en)

[origin: JP2018047696A] PROBLEM TO BE SOLVED: To provide a heat transfer recording medium capable of obtaining an image which has good heat transferability on at least one of a film with low chemical polarity and a film with high chemical polarity, and has excellent scratch resistance and alcohol resistance.SOLUTION: A heat transfer recording medium has a support, a peeling layer provided on the support and a heat fusible ink layer provided on the peeling layer, where the peeling layer contains a first styrene resin, the heat fusible ink layer contains a second styrene resin and a polyester resin, and a content ratio of the second styrene resin in the heat fusible ink layer is more than a content ratio of the first styrene resin in the peeling layer.SELECTED DRAWING: None
