Abstract (en)

[origin: WO2018052803A1] A storage apparatus includes a shelf for supporting goods requiring refrigeration. The shelf includes an engagement member. A support structure is configured to cooperate with the engagement member such that the shelf is configured to couple to the support structure and is movable between a plurality of locations relative to the support structure. Power is provided from a power source to the shelf when the shelf is coupled to the support structure.
