Abstract (en)
A container (10) comprises a box portion (12); a group of aerosol-generating articles within the box portion; and a lid portion (14) movable relative to the box portion between an open position, wherein an access opening of the container is revealed for extracting at least an aerosol-generating article from the box portion (12), and a closed position, wherein the lid portion occludes the access opening. Further, the container comprises at least one extinguishment element (40) comprising a heat-resistant material adapted to withstand direct contact with a heat source at least at about 400 degrees Celsius, the at least one extinguishment element (40) being disposed at a location on an outer surface of a first wall of the box portion (12) or a first wall of the lid portion (14) or both, a surface area of an outer surface of the extinguishment element (40) being at least about 20 square millimetres.
