Abstract (en)

[origin: EP3513682A1] A modular support base (1) for supporting an item of furniture that comprises:- two longitudinal members (2) arranged facing each other at a predefined distance extending along a longitudinal direction (L) between a front portion (2a) and a rear portion (2b);- a front cross member (3) extending along a transverse direction (T) and interposed between two front portions (2a) of two longitudinal members (2) to which it is connectable;- a rear cross member (4) extending along a transverse direction (T) and interposed between two rear portions (2b) of two longitudinal members (2) to which it is connectable;- a junction means (5) for joining said cross members (3, 4) to said longitudinal members (2), which can be configured between a coupled condition and an uncoupled condition. A method for the realisation of a modular support base for supporting an item of furniture is also the subject matter of the present patent.
