Abstract (en)

[origin: WO2015128025A1] The invention relates to an apparatus (1) for automatically cutting a web of material (2), comprising a longitudinal cutting device (60) which allows the web of material (2) to be cut into partial webs (3) and remaining webs (4) in a longitudinal direction L, a discharge device (10) for automatically discharging the obtained remaining webs (4), and a transverse cutting device (70) which is mounted behind the longitudinal cutting device (60) and is used for cutting the remaining webs (4) transversely to the longitudinal direction L.
