Abstract (en)

[origin: EP3514092A1] A vehicle (100) according to the invention for collecting a elongated flexible element (10) that has been laid out on a terrain comprises a support frame (20) configured to support a winding assembly (200) for the elongated flexible element (10), whereby the support frame is configured to be movable across the terrain; and an actuator (250) configured for actuating the winding assembly (200) for winding the elongated flexible element (10), thereby pulling the vehicle (100) in a forward movement across the terrain along the elongated flexible element (10).
