Abstract (en)

[origin: EP2775792A1] The device (1) has a cooking field (11) comprising a cooking point (12) and a heating device (2) for heating a cooking area (31). A safety device is attached to a safety sensor unit. A sensor device (3) detects characteristic parameter for temperatures of the cooking area. A control device controls the heating device based on the parameter detected by the sensor device. The sensor device has a sensor unit that is provided for contactless detection of thermal radiation, where the safety sensor unit is designed as another sensor unit of the sensor device.
