Abstract (en)

[origin: WO2018111212A1] The invention subject matter of the application is related to a glass household object such as drinkware, bottles and bowls that have rough surfaces which enable gradual bubbling and which is developed to regulate the amount of foam at liquid level, to regulate the formation rate of gas such as carbon dioxide and to regulate the bubble formation (bubbling) rate depending on the liquid level on contact surfaces of gaseous drinks with glass household objects.
