Abstract (en)

[origin: WO2018053563A1] The invention relates to a sheet laying device (1) for producing a fibre-reinforced composite material, said sheet laying device (1) comprising: - a lay-up mould (3) for receiving a scrim (4); - a compression device (14) for pressing a web (5) of a sheet-type material onto a lay-up mould (3) or a scrim (4); and - a handling device (16) for displacing the compression device (14) relative to the lay-up mould (3). The invention also relates to the compression device (14) and to a method for producing a fibre-reinforced composite material.
