Abstract (en)

[origin: WO2018054949A1] The invention relates to a device (128) for separating and sorting double pages (108) for a book-type identification, value or security document (108), comprising a supply device (130) for providing separated double pages (108); a storage device (132), wherein the storage device (132) has at least two storage assemblies (164) arranged next to one another and each having at least two storage means (166) arranged above one another, wherein each storage means (166) has a receiving opening (174) pointing towards a transfer device (130) and a discharge opening (176) arranged opposite same and pointing towards a collection device (136); a transfer device (134) for transferring the separated double pages (108) to the storage device (132), wherein the transfer device (134) has a flat support surface (160), wherein the double pages (108) can be provided next to one another or behind one another on the flat support surface (160) in a transport direction (146) oriented from the supply device (130) to the storage device (132), wherein the number of double pages (108) arranged next to another corresponds to or is less than the number of storage assemblies (164); a collection device (136) for receiving the double pages (108) from the storage device (132); and a controller (138).
