Abstract (en)

[origin: WO2018054946A1] The invention relates to a device (200) for producing a data card (106) for a book-like identification, value, or security document (100), wherein the device (200) has the following: - a processing unit (206), said processing unit (206) having a receiving area for the data card (106) and means (216) for connecting the tab (120) and the data card (106) in an overlapping region (121) in a formfitting and/or bonded manner and - a providing unit (204) for the tab (120). The providing unit (204) has a supply device (218) for a continuous belt (220) for the tab (120), a cutting device (222) for the continuous belt (220), and a holding and transporting device (224) for the tab (120). The holding and transporting device (224) is designed to hold a longitudinal edge of the tab (120) and transport the tab (120) in order to receive the data card (106).
