Abstract (en)

[origin: WO2018095682A1] The invention relates to a method for operating a railway system (10). Cryptographic data (70) which comprises at least one key and/or at least one digital certificate is stored in a storage device (42) of a vehicle (40) of the railway system (10), and the vehicle (40) transmits the cryptographic data (70) to at least one track-side device (35) of the railway system (10) when the vehicle is in communication range of the least one track-side device (35) as part of the train travel. The invention additionally relates to a vehicle (40) of a railway system (10).
