Abstract (en)

[origin: WO2018054725A1] The present invention relates to a condensation reaction and/or addition reaction curable coating composition which contains (A) at least one polymer as the binder, (B) at least one crosslinking agent which can be reacted with component (A) by condensation reaction and/or addition reaction, and (C) at least one special complex as a catalyst. The present invention further relates to the use of said complex for catalyzing the curing of coating compositions that can be cured by condensation reaction and/or addition reaction.
