Abstract (en)

[origin: WO2018055111A1] The invention relates to a solid, particulate composition comprising at least one water-soluble or water-dispersible carrier polymer, at least one fragrance, and 1.1 to 40 wt% layer silicate. The invention further relates to a method for producing the solid composition, and to a washing or cleaning agent containing the solid composition. The invention further relates to the use of such a washing or cleaning agent for cleaning textiles or hard surfaces, and to corresponding methods for cleaning textiles or hard surfaces using such a washing or cleaning agent.
