Abstract (en)

[origin: WO2018050952A1] The present invention relates to a method of and a means for fastening an exhaust module (14) of a multi-cylinder internal combustion engine to its support (26) such that the mechanical stresses caused by the thermal expansion of the exhaust module to its feet (24) and the support (26) are avoided by arranging the feet (24) of the exhaust module (14) slide on the support surface (28).
