Abstract (en)
[origin: CN109997166A] Intervention in the operation of a smart contract in a distributed ledger system may include: launching execution of the smart contract; upon launching execution of the smart contract, executing a judgment checking function to determine whether a judgment against the smart contract exists in a judgment database; in response to a judgment against the smart contract existing in the judgment database, intervening in the operation of the smart contract to prevent the execution of the smart contract; and in response to no judgment against the smart contract existing in the judgment database, continuing execution of the smart contract.
