Abstract (en)

[origin: EP3517662A1] The invention relates to a service robot of a ring spinning machine, arranged displaceably along a row of spinning stations with an option of stopping at a selected spinning station requiring a service operation, whereby the service robot is provided with groups of handling means (3, 4, 5, 6) coupled to drives. The service robot (1) is arranged as a vertical frame, which is provided with at least two vertical linear guides (2, 18, 20, 21), whereby at least one of them is associated with at least two movable groups (3, 4, 5, 6) of handling means to perform service operations at the spinning station. The invention also relates to a ring spinning machine with a service robot, which is arranged displaceably along a row of spinning stations with an option to stop at a selected spinning station requiring a service operation. In addition, the invention relates to a method for controlling a service robot or its spinning means.
