Abstract (en)  
A locking system for a pergola-type canopy comprising at least one tilting part (4) joined to the transverse end member (2) by means of a joint (5) and with a free end (8), such that the tilting part (4) is located in correspondence with a portion of the transverse end member (2) which is in contact with a lateral guide (3), it also comprises at least one housing (10) in a lateral guide (3) comprising a first inclined plane (11) and a second inclined plane (12) which converge at one end in a stop (13) and they have another free end, wherein the tilting part (4) has a length (L) and wherein, between the joint (5) and the free end of the first inclined plane (11), there is a distance (d) that is less than the length (L) of the tilting part (4).
