Abstract (en)

A low temperature heater for exhausted gas purification processing of a diesel engine is provided. The low temperature heater includes: a tubular combustion chamber including an open end and a closed end; and an intake pipe, where the intake pipe is arranged close to the closed end of the tubular combustion chamber, the intake pipe includes two outlets, a first outlet is inserted into the combustion chamber and an ignition portion, in an eccentric manner, the ignition portion is arranged on a housing of the tubular combustion chamber via a tubular mount seat, the ignition portion is arranged between the first outlet and the closed end, and the mount seat is in communication with a second outlet of the intake pipe.
