Abstract (en)

[origin: EP3517838A1] The present invention disclosed a lampshade fixing structure for use with light-emitting diode (LED) lamps; it belongs to the technical field of LED lamp; the technical points include: an aluminum substrate, and LED light beads are distributed on one side surface of the aluminum substrate, wherein a lampshade is arranged on the aluminum substrate which is located on the periphery of the LED light beads, and a plurality of positioning bosses is circumferentially arranged at the edge of the aluminum substrate, and L-shaped positioning notches which correspond one-to-one to the positioning bosses are arranged on the lampshade, and the positioning bosses are located in the positioning notches, and a limiting seat is provided at an opening of the positioning notch, and the limiting seat is fixedly connected to the aluminum substrate; the object of the present invention is to provide a lampshade fixing structure for use with LED lamps which is compact in structure, convenient in use, and worked well; used for LED lamps.
