Abstract (en)

[origin: WO2018060316A1] A measurement device (1) for measuring play parameters of a racket sport such as tennis, squash or badminton comprises a main part containing at least one play data sensor, said main part having grooves suitable for receiving strings of a racket stringing. The main part further has raised portions (102, 104) suitable for removably securing the measurement device (1) in a recess in an end (7) of the racket handle, such that the measurement device (1) can be removably secured either on the stringing or in the handle of a racket.
